

ANALYTICAL IN-HOUSE TESTING SERVICES Conducted by **ELISA Technologies, Inc.**

ELISA Technologies offers in-house testing services for meat speciation (cooked & raw) as well as for a variety of allergens (please refer to price list for specifics). We offer a two-working-day turn around time on results from the time we receive a sample*. Our support staff will fax the listed contact person the results as soon as the results are available from our laboratory. We then mail the original report to the listed contact person. Our testing services are highly confidential; information is only reported to the issuing company and then only to their indicated contact person.

A minimum of 100 grams of product is required when sending in a sample for testing.
ELISA Technologies retains your sample for three months before being properly destroyed**.

Our in-house meat speciation testing services utilizes the same tests and official qualitative protocols used by the **USDA-FSIS***** for determination of species in meats and meat products.

Our allergen testing is based on levels indicated on the price list. Some testing can be modified for lower detection limits.

We thank you for your interest in our services. If you have any questions or require additional information please do not hesitate to contact us. Volume discounts are available.

*Offered for most samples, depending on quantity, quantification and special requests.

*Our business days/hours are Monday-Friday 8:30am-5:30pm excluding observed holidays.

**Does not apply to swab samples.
